POAP

Thomas Bocek

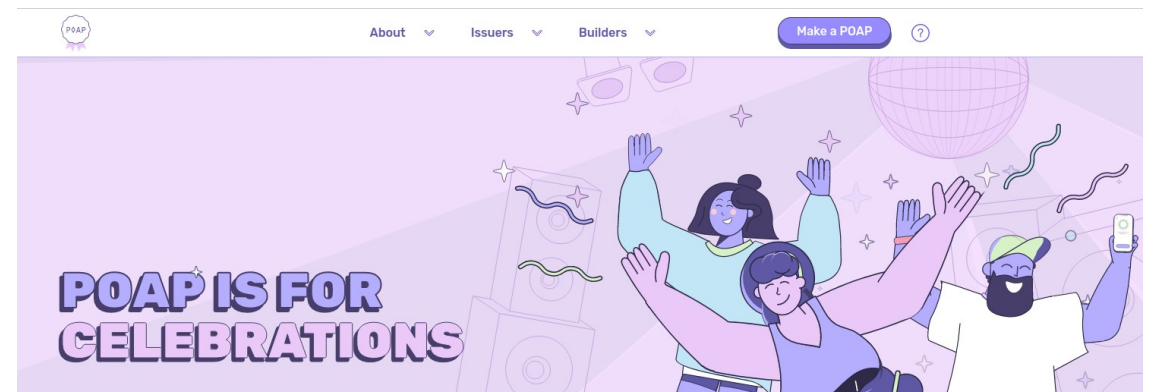

21.10.2023

Introduction

- POAP stands for "Proof of Attendance Protocol." It's a digital badge or token that proves an individual's attendance or participation in a particular event, activity, or milestone.
 - pronounced "poh-ap" or "poe-app"
 - In short, POAP: ERC-721
- Main idea: decentralized way to prove and verify participation or attendance in events
- Soul Bound Tokens - Implementation ~ERC-721 with transfer disabled
- [GitPOAP](#), mostly crypto projects
- Let's do a POAP (past event)

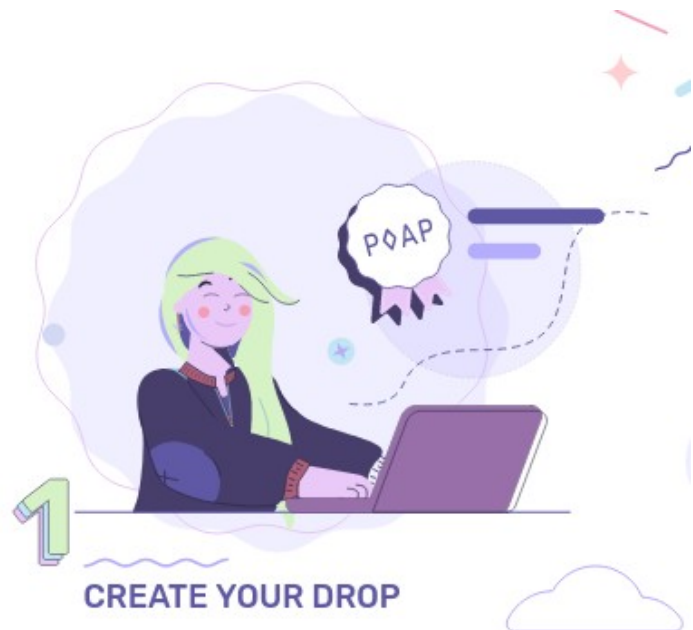

- 1) Must be minted through the official POAP smart contract.
- 2) Must contain metadata related to a specific date or period, up to one year long.
- 3) Must come with an image associated with the event.

guide

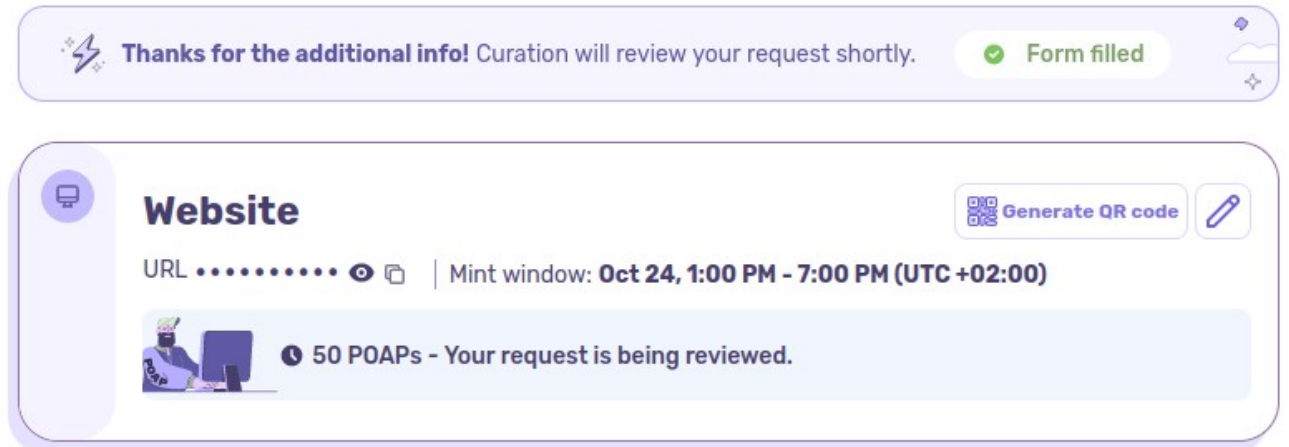

POAP with poap.xyz

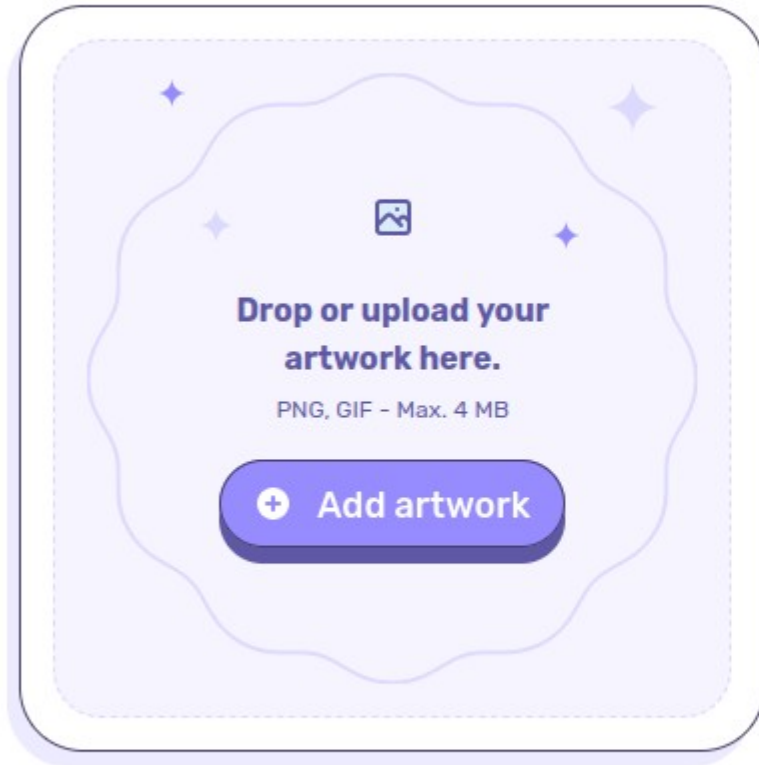

- Event Creation:
 - Organizer or entity creates a POAP token for a special event or occasion.
 - This will be me, the special event will be the BICh lecture on the 23.10.2023
- Distribution: Attendees or participants at the event are given a unique code or link that allows them to claim their POAP token
 - POAP [Kiosk](#)

Distribute your POAP

Let's create your POAP.

i Recommended for optimal performance:
500x500px, rounded shape, less than 200KB
Animated pngs are not supported. Use of gif format recommended.

POAP title *

Blockchain Lecture 23.10.2023

29/150

POAP description *

Embark on a transformative journey into the intricate world of blockchain with our distinguished lecturer, Thomas Bocek. This POAP commemorates an enlightening session at OST, where attendees delved deep into the ever-evolving landscape of decentralized systems, smart contracts, and the future of a trustless economy.

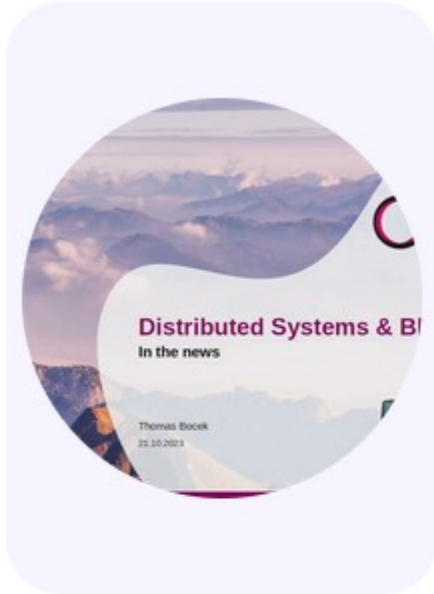

What makes this POAP special? It's not just a digital badge—it's a symbol of your passion for blockchain technology and your commitment to being at the forefront of digital innovation.

POAP with poap.xyz

- Claim: Attendees use the code or link to claim their POAP token, which is then deposited into their Ethereum wallet
 - POAPs can be reserved with an email address
 - Wallet can be installed later on
 - Can be transferred to other chains – Gnosis → Ethereum
- Verification: Once an individual has a POAP token in their wallet, it serves as cryptographic proof that they attended or participated in the event
 - Verify on blockchain
